Bibliography

Long bibliographies can seem daunting, when what is wanted is a few references to follow up. Yet there is a growing literature on friendship and social support for people with learning difficulties, both in the UK and in the US, and we felt it to be useful to list some of the principal texts here. In addition, we list those writings which have been cited in the text, which focus either on general issues concerning people with learning difficulties or on friendship and social support more broadly.

These writings are listed separately here, to ease the task of those wishing to read further. It should be stressed that this is a very selected bibliography and is by no means a complete listing of all the literature in this area.
